Universidade Federal do Rio Grande do Sul, Brasil

ABSTRACT

With a gigantic profusion of technical books published today, we don't have any more a clear vision about which one to choose in reference to the disciplines of Technical Drawing in Brazilian Universities. This paper pursuit is to identify which the best bibliography about the topic to be adopted in the University and by the community. For this, we analyzed teacher's plans in graduation disciplines in several universities. To answer the question in the title on this paper, we took into consideration the relation between the frequency of use and the importance of the University.
