### ABSTRACT

This paper presents a study that intends to contribute to the theoretical foundations of expression and graphical representation for the presentation of architectural-urban-landscape (AUP.) design solutions. The graphic expression-representation (ERG.) was investigated, analyzing presented plates of contests for students of architecture and urbanism occurred nationally in 2014. These studies are the continuity of their accomplishments since 2008, when a methodology of analysis and desirable attributes of a contemporary ERG were established. The aim of this study is to constitute a set of evaluation criteria that is coherent with the qualitative attributes recurrent in the set of contemporary representations, and that can be adopted in academic and professional evaluations.
